DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 3, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,617,418 to Shirani et al. Shirani et al. disclose a communication system in figure 8B with a first network device 532b, a cable 533 and 534 coupled to the first networking device 532b, and a second networking device 530a coupled to the cable. The operation of the system is described in the specification (Col. 9, line 5-15) wherein, the first device can detect the protocol used by the second device and configure itself to that protocol.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shirani et al. in the view of U.S. Patent No. 6,178,180 to Eng et al. Shirani et al. disclose a system as claimed but fail to disclose that the protocol is one of T1 or E1. Eng et al. disclose a system that can function in T1 or E1 protocol (Col. 4, line 38-66). For the flexibility of the system, it would have

been obvious for a person having ordinary skill in the art by the time the invention was made to add the system that can work in both T1 or E1 protocol taught by Eng et al. to the protocols self-configuring system taught by Shirani et al to have a new system that can configure itself the communication protocol and the protocol is T1 or E1.

Allowable Subject Matter

5. Claims 1, and 2 are allowed over prior art.
6. Claims 4-8, and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments filed 11/04/02 have been fully considered but they are not persuasive.

Applicant has alleged that Shirani fails to disclose the second networking device identifies from the cable the first networking protocol (Remark, page 2).

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., determination based on the connection) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Furthermore, during patent examination and prosecution, claims must be given broadest reasonable interpretation. Although Shirani discloses the second networking device identifies from the pulse driven on the cable the first networking protocol, it is still the second networking

device identifies from the cable the first networking protocol. Therefore, applicant's remarks fail to overcome the aforementioned art rejections of the claims.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
